  Test Yantra Software Solution Pvt Ltd (January 2023-April 2023)
  Associate Software Engineer

Project Details:
  Title Of Project: StockTrack Genie
  Team Size: 9

  Description:
      This project is developed during my internship period,The purpose of StockTrack Genie project is to automate the existing manual system by the help of computerized equipment's and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the

same. The required software and hardware are easily available and easy to work with Inventory as described above, can lead to error free, secure, reliable and fast management system.It can assist the user to concentrate on their other activities rather to concentrate on the record keeping.Thus it will help organization in better utilization of resources and keep a track of all the activities. The organization can maintain computerized records without redundant entries. That means that one need not be distracted by information that is not relevant, while being able to reach the information.

Technologies and tools used:
- Java 8 , Eclipse, Maven, MVC, Hibernate with JPA
- MySQL, JPQL
- Git, Lombok, Swagger

Responsibilities:
- Worked on writing Business Logic Layer including Response Structure, Exception Handling and Swagger Documentation.
- Creating the entities of the software according to the Entity-Relational diagrams.
- Coordination with team lead and development team for designing the business logic layer.
- Written Unit Testing using J-Unit.
- Coordinated with the team and prepared Business Logic Layer and Entity-Relational diagrams.
